

Focus on neurology for PACES candidates

Why attend?

This half day course, 13.00 - 16.30, is taught by neurology registrars and consultants, will help candidates to prepare for the neurology station, and potential neurology cases encountered in the MRCP(UK) PACES examination.

The course includes a mixture of short lectures and practical exam stations, mirroring stations 3 and 5 of the PACES exam. Delegates will have the opportunity to examine neurology patients at each station under exam conditions, with feedback from the examiners.
