The methodology used to create these reports is explained in the [non-technical](#) and [technical](#) reports. The results are benchmarked against the results from trainees at a similar level of training in corresponding specialties, these are set out in the list of [benchmark groups](#). “Significant Change Indicators” (▲ or ▼) show a 95% significant change in the mean score for a unit and do not indicate a change in outcome.

Rows in italics and coloured blue contain aggregated 2017 to 2019 results.

The methodology used to create these reports is explained in the [non-technical](#) and [technical](#) reports. The results are benchmarked against the results from trainees at a similar level of training in corresponding specialties, these are set out in the list of [benchmark groups](#). “Significant Change Indicators” (▲ or ▼) show a 95% significant change in the mean score for a unit and do not indicate a change in outcome.

Rows in italics and coloured blue contain aggregated 2017 to 2019 results.
