

Aberdeen AI in Healthcare  
Collaborative (AAHC)

### **Aberdeen AI in Healthcare Collaborative (AAHC) – 1<sup>st</sup> Meeting!**

The Aberdeen AI (Artificial Intelligence) in Healthcare Collaborative (AAHC) has been set up to bring together local people across the NHS, Academic and Industry setting who share an interest in the application of AI to healthcare. We hope to foster discussion of ideas, share working and explore collaborative opportunities.

To mark the start of this venture we are planning an initial meeting where we will have a range of AI related presentations and discussion from local and national experts in the field. This will be an opportunity to learn more about the group, understand how you can potentially get involved, and appreciate how AI will likely help to shape the future of healthcare globally.

Individuals from any background or discipline, regardless of previous AI experience, are welcome!

The event will take place on Saturday 15<sup>th</sup> June at the Suttie Centre, Foresterhill, Aberdeen and is free to attend.

If you think you may be interested, please book at the attached link below. Tickets are moving fast so don't forget to book early to secure your attendance.
